1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.					
2. This REPORT consists of	a total of 4 sheets, incl	uding this cover she	eet.		
3. This report is also accomp	panied by ANNEXES, con	mprising:			
a. (sent to the applica	nnt and to the Internationa	al Bureau) a total of	sheets, as follows:		
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).					
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.					
b. (sent to t	he International Bureau	only) a total of (ii	ndicate type and number of electronic		
carrier(s))					
as indicated in	, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).				
4. This report contains indic	ations relating to the follo	wing items:			
KZI .	asis of the report				
Box No. II P.	riority				
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			ovelty, inventive step and industrial		
Box No. IV Lack of unity of invention			•		
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
Box No. VI Certain documents cited					
Box No. VII Certain defects in the international application					
Box No. VIII Certain observations on the international application					
Date of submission of the demand Date of completion of this report			n of this report		
06 January 2005 (06.01.2005)		   12-April 2005 (12.04.2005)

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US04/17851

Box No. V Reasoned statement u applicability; citation	ınder Article 35(2) with s and explanations sup	h regard to novelty, inventive step or industri porting such statement	al
1. Statement			
Novelty (N)	Claims	1-20	YES
• • •	Claims	NONE	NO
			· mo
• Inventive Step (IS)	Claims	•	YES.
ం న	Claims	1-20	NO
Industrial Applicability (L	A) Claims	1-20	YES
	Claims	NONE	NO NO
			<del> · · · · · · · · · · · · · · · · · ·</del>
2. Citations and Explanations (Rule 70.7)  Claims 1-20 lack an inventive step under PCT Article 33(3) as being obvious over French Patent 2,784,329 in view of Duebel.  French Patent '329 suggested that those skilled in the art of manufacturing jewelry would have known at the time the invention was made to attach the butterfly wing to a transparent plastic layer with a suitable adhesive material would have included the use of epoxy resists to attach the wing; to the substrate. The reference did not expressly cut out the portion of the sheet which extended beyond the wing, however one versed in the art would have readily discerned that to manufacturing jewelry (which is one of the decorative terms which the French Patent '329 can make) that the sheeting would have been removed from beyond the perimeter of the butterfly wing. Additionally, the reference did not expressly state that one skilled in the art would have incorporated plural overcoats of material on the wing in order to provide a lacquer finish upon the same.  The reference to Duebel suggested that it was known at the time the invention was made to incorporate a lacquer as a coating over a butterfly wing in order to preserve the wing, see the right column, lines 10-13. Note that Duebel suggested that the coating applied to the butterfly wing would have preserved the same and facilitated its use in decorative articles, see the right column lines 16-20. It would have been obvious to one of ordinary skill in the art to employ a lacquer coating over a butterfly in the manufacture of a piece of jewelry as proposed by Duebel wherein the same was laminated to a sheet of transparent plastic material with an adhesive as suggested by French Patent 2,784,329.  With respect to the various dependent claims as well as the ordering of the layers, one skilled in the art would have been expected to determine the same through routine experimentation as a function of the desired decorative effects one wished to attain as well as the particular protections needed to preserv
